Investigator summary

Investigator review fixture

Case: preview-fixture
Prepared: 2026-10-12T00:00:00.000000Z | Template: investigator-summary-1
Recorded examiner: Examiner
Case registered: Unknown

Classification overview

Classification	Records	Field / presence comparisons
Exact	10000	30000
Strong	20	60
Partial	0	0
Conflicting	3	9
Unresolved	50	150
Unsupported	0	0

Exact and Strong have no individual details. Exceptional findings below are grouped, not sampled. Record and comparison counts measure different things.

Classification totals by table

Table	Measure	Exact	Strong	Partial	Conflicting	Unresolved	Unsupported
example.records	fields	30000	60	0	9	150	0
example.records	records	10000	20	0	3	50	0

Evidence inventory and recorded acquisition

No stored observations in this section.

Processing and verification

No stored observations in this section.

Physical integrity

No stored observations in this section.

Schema and extraction coverage

No stored observations in this section.

Extracted physical rows

No stored observations in this section.

Decoded event totals

No stored observations in this section.

Transaction outcomes

No stored observations in this section.

Correlation coverage

No stored observations in this section.

Reconstruction coverage

No stored observations in this section.

Log coverage and missing evidence

No stored observations in this section.

Log inventory totals

No stored observations in this section.

Recorded coverage gaps

No stored observations in this section.

Exceptional comparison groups

Conflicting / example.records / balance
R-RECON-003 — Comparable field values differ
The values differ and the log coverage for this record is complete, so the difference cannot be explained by evidence we were not given.
Distinct affected records: 1 | Occurrences: 1 | Context variations: 1 | Source groups: 1

Warnings and limitations

No stored warning categories. This does not prove complete coverage.

Grouped source references

R-RECON-003 / example.records / balance / Conflicting
Evidence: Unknown | Tool run: Unknown | Source: Unknown
Observed locations: 0 | Recorded position range: Unknown | References without positions: 1. Ranges show observed endpoints, not continuous coverage.

Examiner notes and limitations

Fixture notes.
Summary report: complete observations and analysis details are in the full case JSON.
Exact and Strong comparisons are counts only. No individual records are listed.
Custody information reflects recorded observations; unrecorded transfers are not inferred.
Unknown source locations remain unknown. FactumDB does not determine intent or attribution.
Finding groups may overlap; distinct record counts must not be added across groups.
Engine revision: 2 | Renderer: fpdf2 2.8.9
